

POTTY POWER

WELCOME MODULE

Welcome & Our Story

Becoming a mother was one of the most important moments of my life.

I didn't take one single second for granted.

Julianna was born Nov 2012, 9lbs 4oz

Healthy, Happy Baby that first year

Just like any neurotypical child, she was hitting all of her milestones

Crawling when she was supposed to be

Walking when she was supposed to be

Pointing when she was supposed to be

Looking at us right in our eyes

Even talking and saying words right when she was supposed to be

Until she stopped.

In fact, it all stopped.

At 25 Months she was diagnosed with Autism

Our lives had changed forever.

Today...

Julianna, is currently as I record this going into a 3rd grade integrated classroom with neurotypical peers

She is considered indistinguishable ... and yes she is fully potty trained 😊

Motherhood first and everything else second.

It's my compass for always taking
action and leaning into what feels
right for me.

I now help hundreds of other mothers potty train their children.

I also help them to help their children communicate and reduce aggressive or problem behaviors.

A tribe of 10,000 mothers to be the best mothers they can be to have their children strive toward a life of independence like my daughter.

This is my mission in life and now I help other mothers feel the same way.
